	Maximum number video channels/networks	159	200
	Audio – Minimum number audio channels/networks	0	0
	Maximum number audio channels/networks	45	45

¹ The count of systems offering origination and leased access cable channels is underinclusive. If a program or industry guide specifically referred to “local origination” or “leased access,” such references were logged under tallies for those generic categories in the “Local/Regional” section at the beginning of each convergence market’s cable chart. Many locally originated cable programs, however, were listed by their specific titles in the program guides consulted by Media General’s researchers. These programs were then listed in the cable charts under the program titles. Nonetheless, these shows usually represent “local origination” or “leased access” programming, even though they were charted separately and not included in the totals listed above.

² According to FCC Form 346 (Section III, Question 4) on file with the FCC.

³ The overall number of Class A stations increased in 2002 because the FCC granted the pending application for Class A status for WAPK-CA and WOPI-CA, Bristol, VA/Kingsport, TN; WAPW-CA, Abingdon, VA and WMEV-LP, Pennington Gap, VA. The overall number of Non-Class A LPTV stations and number rebroadcasting main stations decreased by the same amount because of the reclassification of the stations as Class A stations.

² The overall number of TV Translators decreased by two because the FCC granted the application of WGOF to change community of license to Knoxville, TN, which is outside of the Tri-Cities, TN-VA DMA and a reference to a Dickensville, VA station was deleted as it was for an expired construction permit and was incorrectly included in Media General's *2001 Proceeding*.
